Aplicacion de Tkinter

- 1.Genera un Dataset con 5000 datos, usando 6 valores de N distintos para la serie de Taylor
- 2.Importa el Dataset a Google Sheets y gráfica, analiza la gráfica y verifica si corresponde con la representación matemática de la función.
- 3.Realiza el mismo ejercicio con matplotlib, y verifica resultados (deberían ser idénticos al del punto 2)
- 4. Analiza el comportamiento de la gráfica del error en función del número de términos en la serie aproximada.
- 5.Del total del Dataset indica cual es el porcentaje de datos cuyo error es superior a 0.1 y cual el porcentaje de datos cuyo error es menor a 0.1.
- 6.Con el Dataset generado, crea otro archivo de datos en los que solo tenga los datos cuyo error es mayor a 0.1, con este nuevo Dataset gráfica y saca conclusiones.
- 7.Usa el celular con PyDroid3 y el computador para el ejercicio.
